

DIP-FI

Discontinuous Innovation Project Finland

...is focused on discontinuous product and service innovations. Project gives an opportunity for 16 participating companies and academic researchers to learn together about:

- managing discontinuous innovation by sharing experiences and reflecting on what has or hasn't worked, and
- by developing a common understanding how to overcome challenges embedded on disruptive events on the global market.

DIP-FI-project is part of DILab network that is the leading "community of expertise" in the world on the field of discontinuous innovation. It involves 10 countries and provides a common framework for the activities within DIP-FI project.

Organisation:

DIP-FI is a group project that consists of two parallel subprojects: DIP-PRO (focused on product innovations) coordinated by HUT/IMI and DIP-SERV (focused on service innovations) coordinated by LUT/SC-Research.
